DEDICATION

*To those who are truly attempting to alter
themselves...*

*To those who are really trying to figure out the
truth.*

ACKNOWLEDGMENTS

First and foremost, we would like to express our deepest gratitude to Allah, who has been observing us in every step that we make. As well as, for shedding light on our way through all the circumstances we have faced. In both hard and good times, in every single moment in my life, your guidance has been leading me to the right way day after day. My trust will be kept on you until the last moment.

We would like to appreciate that person who made the faith his own lightness in the darkness, who struggled to seek the truth and left his wealthy life, who inspired us to write this research Salman AL-farisi. And to our parents who have endeavored in order to make the life good for us

Last but not least, we give our special thanks to our teacher Mr. Nashwan Al-Khawlany for his effort to help us, also friends who stayed with us along this journey, that without them this research may not be existed.

Abstract

The world is controlled ideologically, economically and politically in way that seems that there is a hidden power that manipulates the globe?

Throughout this research, you will reveal the secrets that are too obvious about how they are enhancing our ideas and misleading us. And how they have been utilizing essential human requirements and international economic in their favor, also the propaganda and controlling people using music, social media and entertainment will be mentioned in this research. In addition, you will be able to see their historical attempts to eradicate religions.

Therefore, this research aims to figure out the effect on us and how it really damages our life. In addition, it will gradually clarify who they are and what the reward is to them? Finally, as Muslims, seeking for the truth is one of the fundamentals aims of our life, as well as this project aims

CHAPTER 1

Introduction

From the depth of Persia, to Mecca, a tough journey with several circumstances. From living a wealthy life, to become a slave of a Jewish. All of this were faced in order to discover the truth, to change from obscurity to absolute certainty. Salman Alfarisi, the seeker of the truth which his story gave us the passion to start looking to the world and discover it, to know what is happening in the world and our life, why it goes at the same pattern, and it is totally controlled and manipulated by hidden people who seized all the humanity gaps in order to make their forecasts true.

Starting by the history. That they distorted it and made you feel that you are without a history, your ancient nation did not change and earn anything. And fabricating events that have never happened in order to make themselves strong or oppressed. After affecting individuals by obliterating the history, they start to control the governments by some plans were written in the past to control each aspect of the government. Nevertheless, this gave them the power to manipulate the politics.

Moreover, they started to destroy the trust of the governments by establishing modern systems which all the benefits return to their interests, also their ideologies and the ways of propagating them using the propaganda by media.

The other aspect is entertainment, playing with human emotions, behaviors, and life style. This is how did they start to destroy the human from inside, playing with hormones, ideas, and human nature by spreading deviation, pornography, and atheism. All of these misconceptions ideas were circulated by cinema industry, music, and sports.

Beside all the previous methods of affecting the world politically, and ideology, they also control the most powerful weapon to control the world which is the money and what are related to it from economic to human requirements.

In addition, to emphasize the topic with society, we created a questionnaire to gauge their level of knowledge about these topics. However, we were surprised by the results we obtained. Finally, all these methods that have been used over the history may seem like secrets that no one can discover, while they are obvious to be seen.

CHAPTER 2

The obvious secrets

2) The obvious secrets:

Your life, behaviors, emotions, beliefs, and every detail in your life, are centered on your brain which is still the weirdest mystery of the ages. It totally controls you, but it is easy to be controlled.

However, the war that is considered is a significant war it is not that war with weapons, but it is how to destroy your enemy and countries without shooting a single bullet. It is by controlling the minds. Over the history, they knew and studied how to control people's minds, so they used several strategies to completely destroy it by affecting the history and fabricating events, and it cannot be forgotten the importance of what the politics have done in our daily life from applying many systems, modifying in the laws, flaming the fire between the public and others.

Moreover, how the media color our minds with blood in many events in our life, how it makes from hideous incidents a normal thing, how do they circulate a lot of their ideas.

2.1) Historical Impact:

“The most dangerous way to effect people is by denying and obliterating their understanding of their own history.” George Orwell

Most of people think that what happened in the past has no power to affect their actions in the present, and they have no idea that a small or a big decision that they make in their life is undoubtedly affected by past, even the ancient history.

In addition, if you try to discover our Islamic history, you will be surprised by the knowledge you will face, a full history of victories, braveness, marvelous knowledge and justice. Despite the esteemed nature of historical records, only a limited number of individuals possess a deep comprehension of them. Consequently, there are those who exploit this gap in understanding to effectively erase or distort these records from public consciousness. Therefore, various methods have been utilized to manipulate historical narratives

2.1.1) Distorting the History:

Throughout history, the preservation of events has predominantly relied on the timeless act of documenting them in written form. This traditional practice stands as a cornerstone for accessing and interpreting historical narratives.

However, the integrity of historical accounts has faced challenges due to deliberate distortions introduced into pivotal sources. The inception of this insidious trend can be traced back to the waning years of the eighteenth century, coinciding with the onset of Western occupation in Arab territories.

It was during this era that individuals known as Orientalists emerged, dedicating themselves to scrutinizing the geopolitical landscape of the East, particularly the intricate tapestry of the Middle East. Their scholarly endeavors and subsequent interpretations have left an indelible imprint on the collective understanding and portrayal of the historical trajectory of these regions.

Despite they had a specific work to do, they have dedicated themselves to distort and obliterate the Islamic history by publishing books that directly attacks the history or to take previous books and change the content, and also if there were more than one version, they purposefully concealed them.

To exemplify the books that were published by writers who detested Islam:

1- **HISTORY OF THE ARABS** by *PHILIP K. HITTI*

2- **THE ORIENTALISTS AND THE ISLAM** by *A. J. Wensink*

2.1.2) Fabricating events:

Popularizing a falsified version of history, one that veers far from reality, is undoubtedly a grave transgression. However, an even more sinister development arises when this concocted narrative becomes ingrained in collective belief systems, garnering unwavering support. This risky scenario unfolds when purported victims distort their historical accounts, painting themselves as oppressed while conveniently overlooking their own commission of egregious atrocities against fellow humans. Justifying these heinous acts by citing a manipulated version of history compounds the deception and perpetuates a cycle of misinformation and injustice.

To illustrate this, consider the fabrication of two pivotal events that serve as the cornerstone for justifying their egregious actions.

1- The Holocaust:

During the world war two, when Hitler faced numerous enemies to fight, his primary target was the Jewish. due to that he deemed them responsible for Germany's defeat in the WWI. So, he captured and deported many of them. And brought them into prisons and used plenty of ways to torture and kill them such as, the gas

chambers and burning them alive. This narrative has been presented as the main excuse for what they do.

To truly understand and analyze this historical event, it must be studied carefully, focusing on two aspects.

a- What is the benefit of claiming?

First, the legend of the Holocaust justifies the need of having a country for them.

Second, it justifies the lack of commitment to the United Nation laws.

Third, it is a way to extort the financial and political support from the public opinion under the influence of the collective guilt over the Holocaust, and that gives them the opportunity to commit all kinds of crimes against humanity especially against Palestinians and no one has the right to stop them and if you just talk to them about what are they doing they will answer you simply, “We were oppressed”.

b- Did it really happen?

Over the years after the World War II, Historians have been disputed about the legend of the Holocaust some of them prove it and the others deny it. However, as the Dr. Ebrahim Alish said: *“the legend of the Holocaust has three aspects, first the claims of the Nazi genocide against Jews, second the claims of the 6,000,000 Jews were killed in the WWII, and last the gas chambers,*

which is if we just prove that the non-existence of the gas chambers, all the legend of the Holocaust will dissolve.”
And that is what historians did.

2.1.3) Their Politics Over History:

As a modern entity that it has been in existence around 76 years, and over the history they used to live in disparate groups in each country. This caused they were underdogs. Generally taking the hidden paths to rule or impose by hideous politics. And it is a protracted story throughout the ages.

Overall, inflaming unrests is a famous method that generates many issues between the public and the government which leads to many revolutions, persecuting, terrorism and insecurity. By the way of illustration, the French revolution 1789, Russian 1917, and that one we still suffering because of it until this current time which is the Arab Spring revolution 2010.

2.2) Political Machinations

To live as a parasite, that the only source of food and energy you get is only by another creature, to gradually take the control of this creature and at the end, this creature will not be able any more to control itself. To similar it to the real world, we can observe this kind of controlling by seeing the methods of those people who they are really taking the leadership of most of the countries if it is not all of them.

And to give you more information, their political methods have never changed or updated, they still the same methods they use with the previous countries and governments. As well as, they legalized it into several systems and make protocols to command the whole globe, how to express their actions in media as well.

2.2.1) The protocols of the Elders of Zion:

“The only thing I would like to mention about these protocols is that the protocols have exactly predicted about what is happening these days.” H. Henry

The entire world has never seen a book that stirred up a controversy more than it. And the opinions have never been contradictory in a book as it did. Moreover, people differ on its validity, origin, and author.

2.2.1.1) What are these protocols?

They are 23 conferences started in 1897 and finished in 1951 and talked about the plan of creating a worldwide kingdom which identify the most significant target for them. Whereas the original documents breached by a French lady who delivered them to a Russian man who studied and analyzed them and compared them to the factualness, and published all over the world.

- Protocols' Predictions:

- The prediction of the falling of the Uthmanic Empery by Jews before Israel was existed.
- The prediction of the world war for the first time for the whole history, where both sides are lost, and the only real winners are them.
- The prediction of the falling of the European kingdoms which they are already fallen.
- The prediction of the spread of strife, unrest, and economic crises internationally

2.2.1.2) The protocols aim:

- Taking control of affairs in the world.
- Spreading chaos and immorality among nations.
- Undermining all foundations of religion, patriotism, and moral integrity.

- Make the fundamental world economic based on gold which they own it a lot.

2.2.2) Ideologies and government system:

Beliefs, concepts, values, principle controlling, enforcing, Freedom slogans, these are what represent Ideologies and government systems which can manipulate the emotions of the society and leading them as they want.

2.2.2.1) Ideologies:

All things that regard to the individual about their beliefs and concepts it is not more than an ideological game that serve their personal interests by guiding them in the way they want. The kinds of ideologies are many, but the most popular kinds are, communism, and capitalism, which have a huge range of influence in several aspects of life.

2.2.2.2) Government Systems:

On the contrary of ideology, it deals directly with government. Which you can see sometimes they inaugurated a president that he will refer benefits to them. On the other hand, if he is not as beneficial as they expect, they will change or execute him in a way that seems normally, and under the impact of democratic and the others of systems, which make it easier to them to control and apply the instructions.

2.2.3) The Influence of Politics on The Media:

In light of the major changes that the world is facing, especially in politics. It can be seen obviously the relation between media and politics which have an important affect in the events, and has an integral relationship between them that to make any change in a country whether it is good or not, the only way to express your actions is only by media. However, in a simple way, we can consider the media as the gate to express the political decisions and to make the public obey them by employing diverse strategies like framing theory and propaganda.

1- The Framing Theory:

When you go to your friend's house and he greets you. The first thing he would say to you for example is, would you like to drink tea or coffee?

Absolutely it will not come to your head that you want juice or ice-cream, because of he framed for you choices that you have to choose one of them not to choose something you really want.

That is simply what they do in politics. They give you choices to select and make you feel that you are free to choose anything you want even if it is against them, but in the reality all the choices they gave you are already for their interests. For instance, when they want to pass their agendas to a specific country, they do that by elections, that country is considered as a democratic country and the public has the right to rule themselves, but it is not as they think, because they give the public candidates that they are part of them. Also, in media, they give you two or three ideas that you think you have the right to select, but in fact you are deluding. And this is just the tip of the ice.

2- Propaganda

Have you ever asked yourself when you are watching the news, why it is free? Why the news has to be inside every single house in many ways?

Despite, the huge costs of productions and salaries it stills free! It is not the only problem, because you can find many channels in the same way. However, the much of knowledge and information that comes to you from media have the ability to shape your mind and concern. So, they keep telling you and repeating the same ideas in many channels that your mind will unconsciously consider them as they are the truth. In order to keep you away from what is really important and to keep the truth unknown. And one of the most common examples that use against us Hasbara.

- **Hasbara**

Hasbara is a word in Hebrew that means “explanation” or “clarification” and it is the propaganda machine employed by the Israeli government globally serves to whitewash its massacres and violation of human rights and international law during the wars it wages against Palestinians in the occupied territories Israel utilizes hasbara as a general diplomatic technique, where misleading information is harnessed and linked to its strategic objective to justify its action. It stands as one of the fronts in Israel warfare.

2.3) Entertainment

When your dopamine gets high, when the adrenaline flames inside you from excitement, when you see your favorite sport team wins and you scream out, I won. When you feel happy that you have new followers and more likes in your accounts. When all your achievements you have earned in this life is that you have watch more movies, know more singers and you have high ranks in games. However, that is what they want you to be a weak person that you are not able to do even your daily tasks. To be like a drug addict that every day you have to take a dose by, social media, music, sports, and cinema, and these are the ways that you are manipulated by.

2.3.1) Social Media:

After people are already addicted to the internet and social media, and they cannot stop it any more. They started to attack people slowly by:

- Promulgating their ideologies such as, atheism, materialism, pederasty, and pornography.
- Reducing the meaningful content and spreading the trivial and silly content.
- Create events to make arguments and to fabricate event such as the unit 8200.

Consequently, these factors led to an enormous impact that the social media change from a way that connects each other to production and consumption. And, it effects the physiological health that people became more impatient, if they want to learn or search about information, it has to be quick and shortened. Due to that kind of content which is short videos. Moreover, people start to get used to their ideologies even if they do not accept these ideologies, so this what do they really want.

2.3.2) Music:

Human brain is a complex organ, anything that you tell it, it directly believes and make it as if it true. It unconsciously keeps any information you have known whether it is good or not. It always tells you that you are right, and that is what makes the song lyrics that you listen to impact you and gradually become what you listen to. For example, people who listen to the hip hop you will see them wearing like gangsters, their accent is different, even their way of walking, or those who listen to sad music, they act like their life is destroyed. Therefore, it can be deduced from this that you are what you listen to.

In addition, to understand how the music works and how do they seize the music to manipulate us. You have first to know what the music is?

In order to know what the music is, you have to separate it into its bases. It is a group of lyrics and beat which those are a group of frequencies.

a-Frequencies:

All the sounds around us are quantities of electromagnetic energy that travels through the air in the form of waves; this is a simple definition of frequency.

Frequencies has several waves that have the ability to affect us for example, the 440HZ frequency which can cause harm to us that in 1953 the enemies against humanity decided to impose the 440HZ on humans. A decision was issued by the International Organization for Standardize (ISO) that all music in the world should be produced at that frequency, which causes cases of depression, and mental illnesses.

b-Lyrics:

The lyrics that you listen directly it harms you, but at least you can recognize what the lyrics are. The hidden way that most of people do not know and only few singers talked about, and get killed after that, is any song that you listen to has hidden lyrics that you cannot listen or comprehend because of it has recorded backwords! Which if you play the song backward you listen to their hidden words that most of them praises the devil.

This hidden way is considered as one of their methods to manipulate people beside the oldest methods that it has been used form the ancient Greek, cinema and sports.

2.3.3) Cinema and Sports:

Sport is a normal activity that the ancient human did as the modern human, but what the ruling families and kings have done all over the time, seizing it psychological and financial gains. As what happened in ancient Greek by the establishment of combat circuses and theaters. All this is the same as what do they do by establishing sports competitions and ceremonies, but they add hidden and very effective ideas that really harm the human nature such as what happened in the opining the 2024 Olympics in Paris like, insulting religions and sexual deviation.

Moreover, what they imply in cinema do not least of what happens in the sports. This old industry has been manipulating the world since the birth of it. If you concern it, you will see how gradually they propagating the same ideas, insulting religions, by atheism but in vary degrees. Until these days they show it in blatant way and make it as a normal thing in our life. As we see, some religious in their society start to disbelieve in their religion question about it or being atheists.

2.4) Religion Distorting:

The world gets differences more and more, starting from promoting new theories about the humanity, beginning from the evolution theory. Ending to the point they want, which is disbelieving in god in another word atheism. As the researchers conducted that the amount of atheist people is getting higher and higher. So, all the attempts over history have succeed while other they could not even to affect it. But throughout the history the methods remain consistent.

2.4.1) Distorting the Religious Teaching:

More questioning, many discussions, several creeds. This is what happened when those hidden people seize religious teachings to their side, by giving people a conflicting topic to argue about, guiding them to the false questions that harm the belief. Creating several creeds to make people confused as well. And these methods are the easiest to lead people to atheism.

2.4.2) Believing in Materials:

Science makes our life easier and easier, but when the science becomes against the mind disseminating erroneous beliefs for instance, the evolutions theory, which consider the human as an evaluated creature from some kinds of animal, or a single cell creature. Until they tried to make god in their laboratory, which led them to atheism.

2.5) Economical Manipulating

It was known previously that to buy something, you have to exchange it with another thing. It continued for ages. Until the first metal coin was coined. Which they used gold, silver, and copper. It also preserved since the small paper with a massive power was first printed.

Furthermore, money has become several currencies, until each country had printed its own currency. That resulted various money revolutions and banks wars.

2.5.1) Money revolution:

Have you ever asked yourself that how a piece of paper can worth a lot in a geographical patch while it worth nothing in another land? This is due to the powerful ruling of money. And the story of the birth of the controlling money:

- Their continuous targeting of controlling money, which is noticed in the ancient centuries by coining currency for some emperors such as the polish, Romanian, and Hungarian.
- Changing the International Economic system from depending on silver to gold which they own it a lot.

- Then they depended on the paper money and checks that are related to gold.
- They canceled the governmental currency which depend on silver by loaning checks that related to gold and this caused the banks coining the currency, not governments.

2.5.2) Banks:

After people and governments started depending on banks, which gave banks the ability to dominate the economic system all over the world. By loaning the governments and individuals with profits which creates a lot of economic crisis.

loaning governments and organization Global crises are manufactured through the strategic funding of select governments and organizations. The process typically begins with the financing of specific produced companies and the facilitation of public access to them, fostering an investment culture. Consequently, a considerable number of individuals channel their financial resources into these ventures, only to subsequently withdraw their investments, precipitating numerous collapses in these financial endeavors, accompanied by substantial losses. This ultimately compels governments to engage in irrational borrowing practices from these entities, precipitating an unprecedented economic crisis. This, in turn, coerces

governments into a state of subservience to financial institutions such as the International Monetary Fund, perpetuating a cycle of economic dependency and vulnerability.

To summarize, they utilized the method of creating a crisis and then providing the solutions. They began by causing an economic crisis that harmed the government, leading the public, who had already saved their money in banks, to demand access to it. However, the banks lacked enough liquidity due to lending money to individuals for their livelihoods. This resulted in a liquidity shortage, high rates of poverty and unemployment, and eventually led to the lockdown of factories and facilities. This situation is seen as an endless cycle for controlling the economy.

2.6) Human necessities:

Every time you go shopping, you buy from my companies, and in every corner of your house, it's made by my production, even your means of transportation and entertainment, and your entire lifestyle is designed by me. With these words, the major corporations Constitution was engraved. It may not seem normal, but this is the new way of governing the globe by seizing all the aspects of humanity needs.

2.6.1) Major Corporations:

Countries, presidents, and politics. This is what many believe about governments, a name derived from govern. However, govern has never truly been in the hand of government, but rather in the hands of the major corporations. These companies, have owners who represent the hidden power. And the major corporation that all companies around the world related to it can be divided into three aspects, food, financial, technology. Each aspect includes a group of multinational companies that control all vital processes from food to economy and technology.

2.6.1.1) Food Corporations:

There are ten international companies that control each food brand around the world:

- **Kellogg's:**

It is an American company that has 30 brands around the world such as *Fruit Loops*, *Corn Flakes*, and *Pringles*.

- **Associated British Food:**

It is a worldwide British multicultural company for preparing and trading food, it has 50 different brands like, *Twinings* and *Jordans*

- **General Mills:**

It is an American company for food that has more than 100 resisted brands. Regarding all aspects of food.

- **Danone:**

It is a French company that has more than 200 brands in all aspects of food.

- **Mondelez International.**

An American company that owns over 50 brands like, *Oreo*.

- **Mars:**

It is also an American corporation that has 100 brands. Which the famous brands are *M&M*, *Uncle Bean's*, and *Starburst*.

- **Coca Cola:**

This famous company goes beyond being just a soft drink company, but it owns 500 registered brands.

- **Unilever:**

A British corporation with 400 brands in several aspects of human needs.

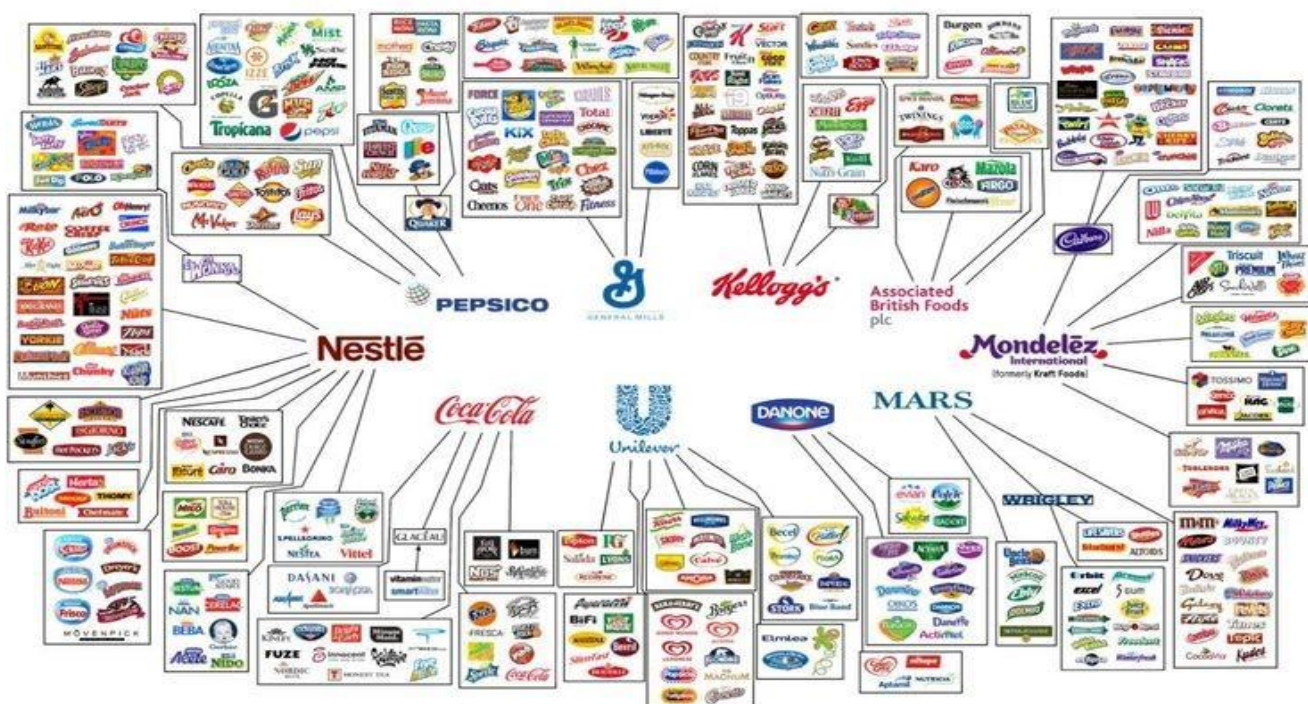

- **PepsiCo:**

There is no one that does not know the soft drinks Pepsi. It is a company that only has 23 brands, but each brand is a huge company such as, *Quaker*, *Cheetos*, and *Tropicana*.

- **Nestle:**

It is considered as the biggest company around the world and it is based in Switzerland. It has 2000 brands.

Those ten companies control and have 3453 brands. Even if the company that are not related to them, but at least they import the raw materials from those ten companies.

Before moving to the other section, a vitally important question should be asked, which is, if those corporations dominate the whole aspects of the international economic, are there any corporations that control them?

The answer is yes. Searching the financial reports in the *Business Insider*, *Market Watch*, and *Yahoo*. We found that there are ten foundations that have most of the companies around the world whether by stocks or investment funds and the biggest one of them is *The BlackRock*. And if you cannot find any name of them in some companies, you will find another investment company that is in their ownership, by the hierarchical graduating. For Instance, Almarai company has 20 commercial brands in the middle east, however third of its stocks are totally owned by the Saudi Investment corporation *Savula*. While part of Savola is owned by stocks and investment funds to the American corporation The BlackRock!

2.6.1.2) Financial Corporations:

After some studies were done by the *New York Times* journal, they conducted that there are ten major corporations that control 20% of the global financial network, while the hugest 50 companies dominate 40% from the entire economic all over the world. As well as these corporations depend on framework of structural companies which mean they work with each other as a related network in order to ensure that they have all

the control, and if you have been questioned by yourself who they are, here they are:

Barclays Banks, Capital Group Company, fidelity Investment, Akxa, State Street corporation, Morgan & Chase, Legal & General, UBS, Merrill, and the biggest, The BlackRock.

In this groups of corporations, we have found all these companies are under control by *BlackRock, Morgan, and American bank*. Therefore, they are many people get astonished when they have reached to this fact which these 10 groups we have mentioned before. They intervene in the ownership of all the world's companies

If you are still doubting about all these facts, and you are still thinking they have been by coincidence. You have to be surer by looking at the whole picture, which is the technology that you use it almost your day.

2.6.1.3) The technical, industrial, and energy corporations :

That small device you carry every day, and the indispensable search engine which answer your question, the metal piece which is setting on your desk contenting your vast information and uses as well, from buying goods to communication. These what the hugest technical companies offer such as, *Samsung, Apple, Google, Microsoft, and Amazon*. after searching about

who own this companies, it is appeared that 40% from this companies are owned by the massive corporation. Moving to one of most useful thing in our life which is electricity and the companies that provide us with energy are under control as well, and the example of them a lot. Stopping in the last station from the produces that *Tesla*, *Ford*, *General Motors*, and the other produce for us like cars, motors, and some industrial stuffs, all that is under their service and own.

At the end, all this huge numbers and what is inside it from manipulating and seizing human needs to control them from each aspect in their life, the massive amount of money that they gain from us is not more than obvious fact for what their aims.

CHAPTER 3

The study

3.1) Study design:

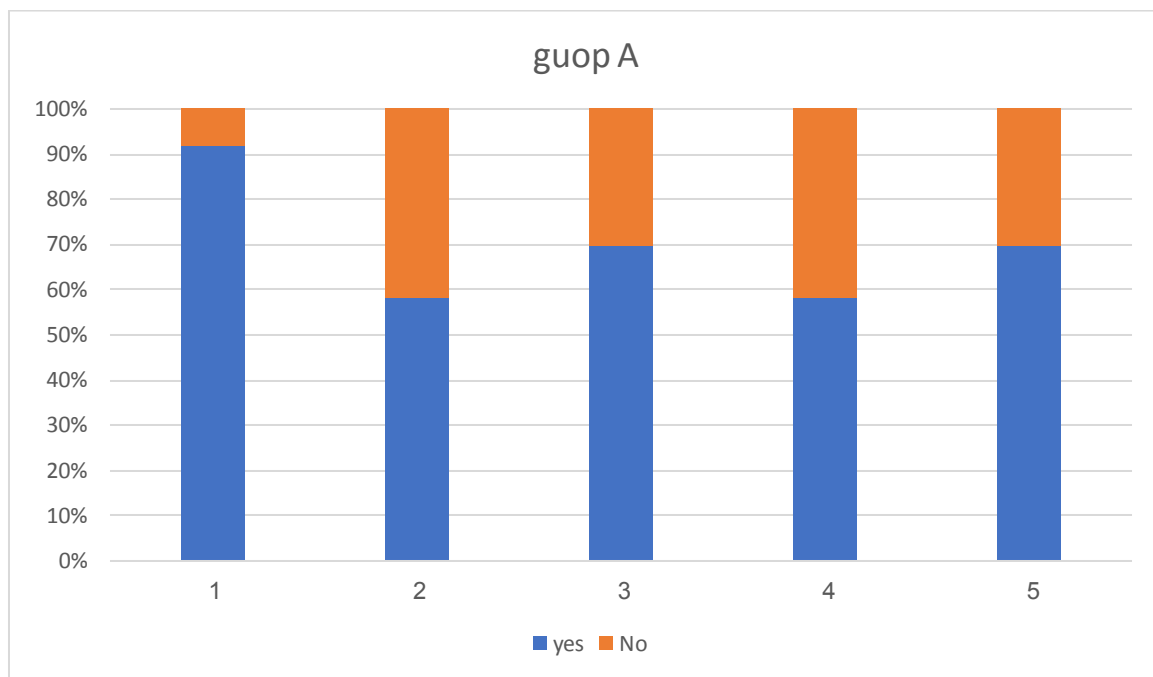

In this research, a questionnaire has been designed to answer the questions. There are 25 questions that have been written in an understandable way. Therefore, everyone, from different levels can understand the questions and answer them clearly.

3.2) Subject of the study:

People of different ages were selected to guarantee collecting the data needed for the research about the topic we cared throughout the research paper.

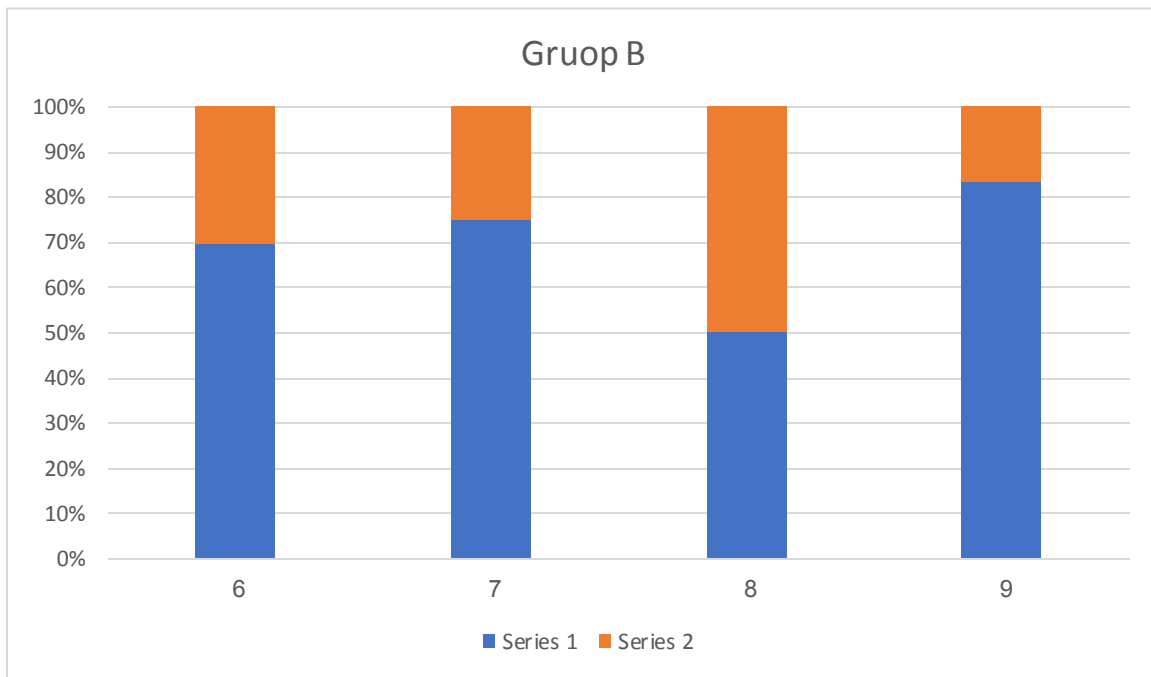

3.3) Data Analysis:

The final results of the questionnaire are elucidated below. It will be explained statically, and what is the use of asking these questions. So, the questions are divided into groups. Each group conveys one aim.

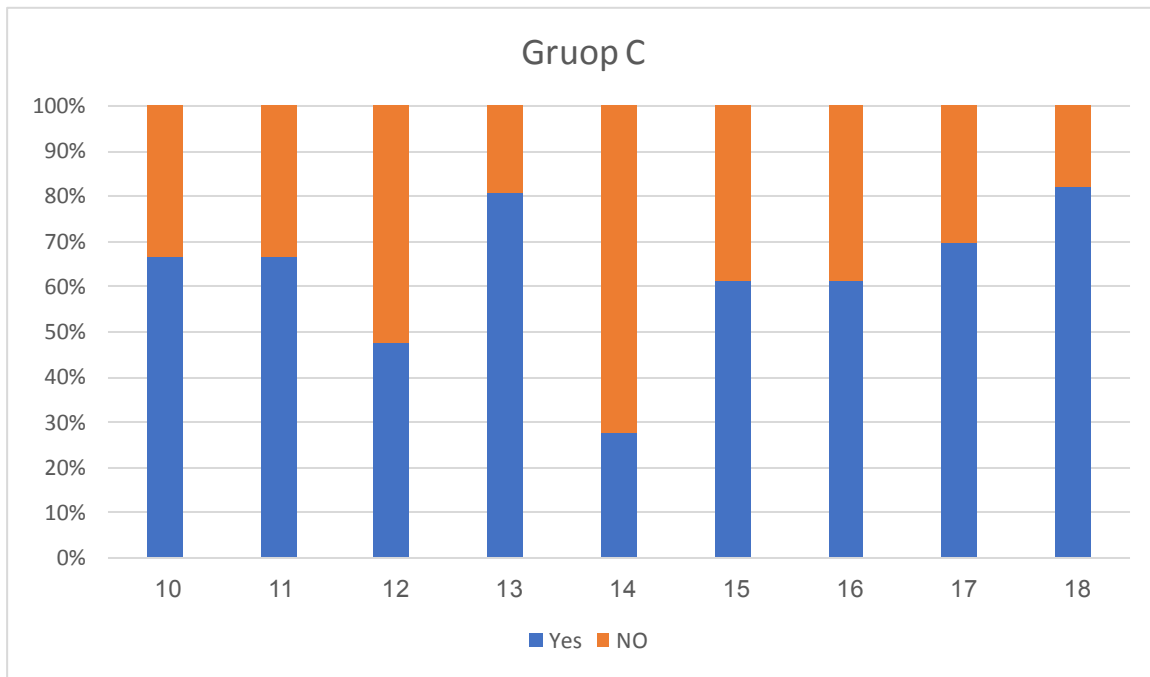

N	Questions	Yes	No	Total
1	Do you agree that what happened in the past can enhance the present?	92%	8%	100%
2	Do you agree that all people should know the whole history in order to understand the future?	68%	32%	100%
3	It is believed that faking history has the ability to control us?	69%	31%	100%
4	Do you think that there are benefits for hiding and changing the history?	68%	32%	100%
5	Do you think that they can control us by faking history?	69%	31%	100%

In this group, several questions about history were asked. However, the rates show that the majority of respondents were agree that history is a powerful way to affect people and it has been used to affect the humanity.

N	Questions	Yes	NO	Total
6	Do you agree that there were some written plans to control the world?	69%	31%	100%
7	Do you agree that there is a hidden power that controls and manipulates the governments pf the world?	75%	25%	100%
8	Do you agree that the governments all around the world follow the same pattern of rule?	50%	50%	100%
9	It is believed that they utilize the governmental organizations to reach their aims?	83%	17%	100%

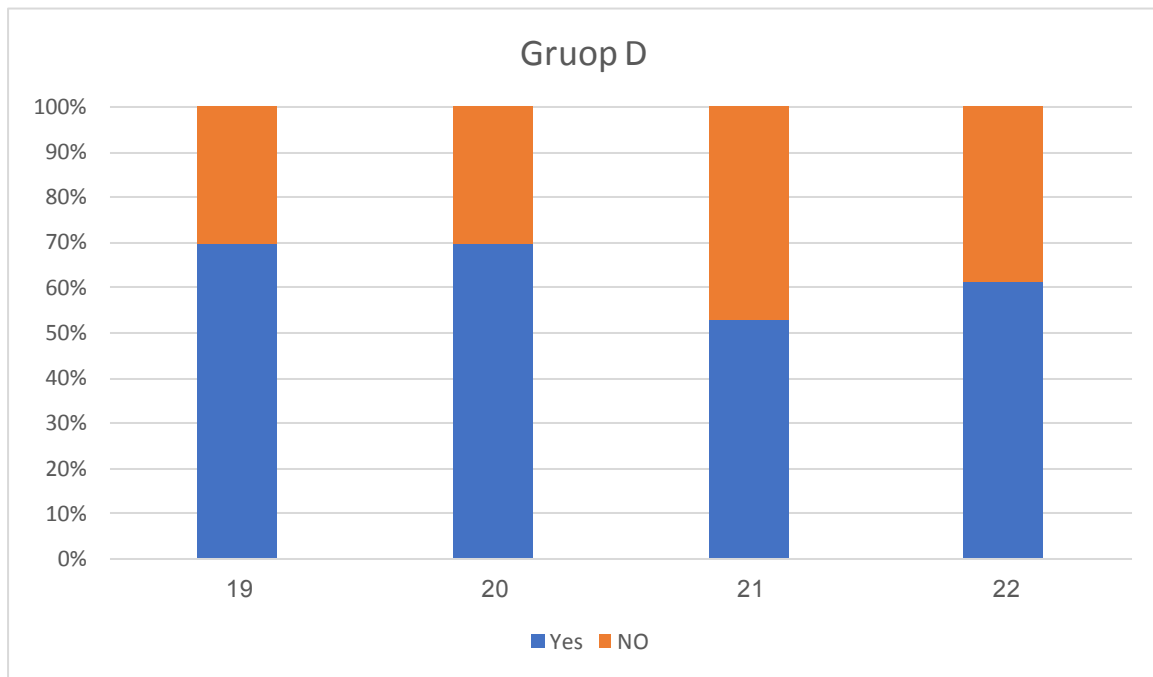

In this group, 69% of the respondents agreed that there are written plans to control the world, in which they are the Protocols of elders of Zion. Also 75% agreed that the governments are controlled by hidden organizations. Moreover, those organizations have achieved this aim of govern the governments.

N	Questions	Yes	No	Total
10	It is true that one of their ways to control people is by media?	67%	33%	100%
11	Do you think that they use media to make them innocent?	67%	33%	100%
12	Do you think that social media is totally positive thing?	58%	42%	100%
13	Do you think that social media helps them to spread their ideas?	81%	19%	100%
14	Do you consider music as a fundamental thing in your day?	29%	71%	100%
15	Does the music have the ability to change your emotions?	61%	39%	100%
16	Do you think that celebrities like singers, actors, and athletics are forced to support and spread the ideas of	61%	39%	100%

	these hidden organizations			
17	Have you ever focused on a movie that you think they tried to lead people to believe in false misconceptions like atheism?	79%	21%	100%
18	Do you agree that those people who trying to lead people to atheism are the same who tried to distort precious religions?	82%	18%	100%

In this group, we made these questions from the daily life that people live, we conducted that 66% of people agreed that the social media is just another tool for those organizations to control people and to make themselves as if they are innocents. Also, there is a low rate that shows people do not considered social media as a positive thing, and 93% of people agreed that social media is just a perfect environment to spread their fault ideas. Moreover, 28% of respondents do not consider music as a fundamental thing for them but 61% of them can be affected by it. In addition, 82% agreed that those who try to lead people to atheism are those who distorted the previous religions.

N	Questions	Yes	No	Total
19	Do you think that there are some Muslim countries that deal with profits?	70%	30%	100%
20	Do you agree that there is any way that the banks can control our life?	70%	30%	100%
21	Do you think that the international economic is being controlled?	52%	48%	100%
22	Do you think that all the companies around the world referred to a main head company?	61%	39%	100%

In this group, a high rate of respondents agree that some Muslim countries use the profits in loaning from the international banks. And if the banks have the ability to control our life as well as the economic.

N	Questions	Yes	No	total
23	Do you think that these hidden organizations manipulate the humanity needs?	63%	37%	100%
24	Regarding to the humanity needs, these hidden organizations may be changed and added substances to slowly destroy the human?	61%	39%	100%
25	Do they achieve what they want?	85%	15%	100%

These three questions were asked in order to know the average of respondents who agree of the humanity needs are being totally manipulated and do they achieve their aims after doing all of this.

CHAPTER 4

Discussion

4.1) Discussion:

After studying the statics, we conducted that, a high rate showed that people already know they are under a big manipulation, also they recognize that faked history is considered as a main way to control us, but almost no one has started studying history from reliable sources. Also, by this history manipulation, they could affect the way of govern and if you just study the situation that we are in, you will recognize that those hidden organizations had a hand in every country around the world.

According to the statics, most of the rates show that most of people are affected of the social media and other entertainment ways. Indeed, they know or feel that it is not a good thing anymore, they still using it, while it is the place of aberrant ideas that they want us gradually to believe. Moreover, if you recognize the massive impact of music and their ideas in your life, personality, and behaviors, you will not only decreased listening to it maybe you will stop. Also, in this mean time, most of people especially this last generation, are affected in the movies, series, and sports. While they have no idea that cinema industry it has become a very effective way to spread any kind of ideas they want, for example, when watching a film from the 1970s, you will notice that they used to present their bold ideas like sexual deviation and atheism indirectly

as if it is a hint. However, in contemporary films, these ideas have become very explicit.

Finally, all the humanity needs are under control as well as any other aspect of our life, all the companies that produce food, technology, and energy is related to them directly or indirectly. In addition, the statistics showed that most of respondents know this international game that we are under it.

CHAPTER 5

Conclusion

5.1) conclusion

“The sun that shines today is the sun that shone when thy father was born, and will still be shining when thy last grandchild shall pass into the darkness” George S. Clason

The universe has remained unchanged since eternity, and everything that occurs is merely a repetition of what has happened before. Similarly, human nature has not altered since ancient times, with individuals still influenced by their adaptable nature to different environments and the resulting emotions and actions which they are the first step to them to manipulate the humanity. However, when a person seeks to tame an animal, he shall study the desires of the creature to achieve control over it. This is exactly what these hidden organizations and people have done by dedicating themselves to studying and exploiting humanity in the most despicable ways to achieve their objectives. The chaos and control we witness in our lives today are nothing but the execution of plans that were previously devised to manipulate the course of human history.

In addition, they manipulate politics, which has now fallen into the hands of impostors who adhere to supposed international laws set by the hidden organizations, also through the propagation of deviant beliefs that deviate from human nature, such as deviation and atheism. If you ever wonder how this happens, it simply unfolds before you every

day through devices that were invented not only for utility but have been twisted for their personal gain.

Through these means, you are exposed daily to the same ideas and methods of influence repeatedly until your mind perceives them as reality. Let's not forget that they were and still are the masters of wealth and gold, enabling them to control the global economy and trade, making everything ultimately return to them and their companies, both directly and indirectly.

Finally, you may be asking yourself now, who are they? Are they truly a Masonic faction, or perhaps the Jews themselves? Could they be veiled within a tangled web of international conspiracy, or do they transcend even these classifications? All of these questions must be asked to yourself because all of this research is a key for you, and the choice is yours to discover the truth that has always been clear. Be a seeker of truth like Salman Al- Farisi.

5.2) Recommendations for researchers:

1. This project has opened several doors to different real circumstances that the world faced.
2. Try to choose a topic that you have a deep comprehension of it, not selecting a topic from AI.
3. During doing the research, try to read more about your topic in English language. And try not to copy any information you have, it is better to read then rewrite in your own language.
4. Maybe you will get stuck, just keep searching and never stop.
5. Books are the best references for you; also try to avoid using AI. AI is a good source of vocabulary not reliable information.
